**Building Permit Fees** - Building Valuation Table – see above: The Fee complies with the definition of “valuation” in Section 423 of the State of Oregon Structural Specialty Code and includes Architectural, Structural, Electrical, Plumbing, Heating, Ventilation Devices and Equipment. The valuation also includes the contractor’s profit which should not be omitted. The determination of value or valuation under any provisions of this code shall be made by the Building Official. The value shall be the estimated amount from the City of Newberg building valuation data table or the estimated value including all construction work for which the permit is issued as well as all finish work, painting, roofing, electrical , plumbing, heating, air conditioning, elevators, fire extinguishing systems and any other permanent equipment, whichever is greater.

The square foot construction costs table determines the cost of the project by the building use and type of construction. To calculate the valuation, the cost per square foot is multiplied by the projects total square footage. For projects where square footage is not added, the value is calculated by multiplying product value by 1.6 to determine valuation.
