

Newberg Urban Design Verification (UDV) Study

Spring 2024

We are identifying improvement ideas on E 1st Street and E Hancock Street (OR 99W) and OR 219 in Newberg.

This “urban design verification” (UDV) study focuses on finding ways to make the road **safer** and **easier to travel** on for everyone, including people walking, rolling, and biking. We'll look at how the road is used now and come up with ideas to improve it for the future.

The Newberg UDV is focusing on downtown Newberg, including two areas:

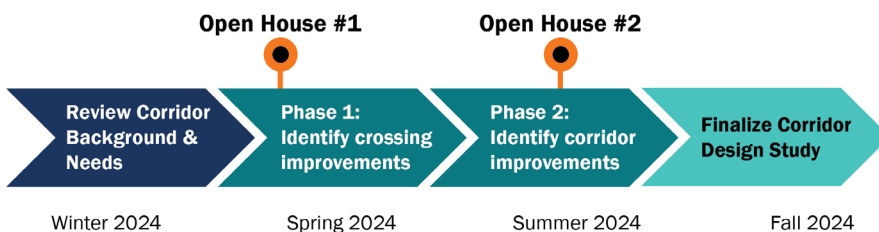

- Along **OR 99W** through downtown on both E Hancock Street and E 1st Street.
- Along **OR 219** from OR 99W to S Everest Road.

Through this project, we will engage the Newberg community to understand current challenges and develop community-supported solutions.

Project Timeline

We have several opportunities for you to share your thoughts on the study in 2024:

- This Open House #1 is open from March 13 to March 31. Tell us how you travel in and around the study area and what issues are most important to you.
- Open House #2 and an in-person event is planned for Summer 2024.
- The study is expected to be completed by Fall 2024.

How can I help the study?

Check out the **online open house** and fill out our survey before **March 31!**
