Opportunity Summary

The Oregon Department of Transportation ("ODOT" or "Agency") is seeking Proposals from Professional Services and Related Services consultant(s) to provide preliminary engineering and construction engineering Services (Architectural and Engineering Services).

The City of Newberg received a Safe Routes to School ("SRTS") Grant to be used for preliminary engineering and construction engineering and eventually construction of a large covered bike shelter or two separate smaller shelters with bike racks and additional paths on the grounds of Mabel Rush Elementary School on Deborah Road, Newberg, and solar-powered, programmable school zone flashing and speed feedback signs to facilitate student movement between school facilities and adjacent neighborhoods. Deborah Road is a City street classified as a major collector that serves a large residential population and several schools in the Newberg School District. The State funding with the City's matching funds have been initially designated to complete the Preliminary Engineering ("PE") and Construction Engineering ("CE") phases of this Project. This Project will enhance safety for school children walking and bicycling to school.

Manual & Electronic response must express an interest. Manual response must 1st DOWNLOAD the document. Electronic Response [if allowed] - must express interest; select Respond Online & complete response. Instructions can be found in the HELP screens
