**PROJECT OVERVIEW**

E Crestview Dr. is an important connection between the northern portion of the city and Oregon Highway 99W. In the 2016 Transportation System Plan (TSP), Newberg identified the need to improve low to moderate-capacity roads, which serve to move traffic from local streets and residential properties to arterial roads (Collector Streets). E Crestview Dr. between N Springbrook Rd. and the Yamhill County line has been identified as an important improvement project that will benefit the community.

The City and the project teams have been working on refining the project elements to bring E Crestview Dr. up to major collector street standards. A mini-roundabout at Westlake Loop and stormwater pipe replacement on N Libra St. have been added to the project elements. The stormwater replacement on Libra is to accommodate storm runoff from portions of E Crestview Dr. The section of E Crestview Dr. from Highway 99W north to the Yamhill County line is not part of this project.

Please read further to see how you can participate in providing your input and keep up to date on the project as it moves ahead.

The City of Newberg is mid-way through the design phase of this roadway improvement project. When completed the improved roadway will connect N Springbrook Rd. with NE Crestview Dr. (outside the city).

Multi-modal roadway improvements and a design speed of 25 mph along this section of E Crestview Dr. will make the corridor safer for people riding bikes and those using the sidewalks, as well as improve the overall quality of the road.

Work will consist of a new mini-roundabout, repaving the roadway, new curbs and sidewalks along both sides of E Crestview Dr., adding new bike lanes on both sides of E Crestview Dr., relocating existing utilities underground, and constructing water, wastewater, and storm drainage improvements.

More information about what to expect during construction will be provided prior to the beginning of construction.
**NEIGHBOR COORDINATION**

The City and project team will continue to work with the community and adjacent neighbors to gather input and concerns, and to keep them informed of the project progress. Public outreach will continue this fall to provide project information to the community and to individual property owners.

Open House #2 will take place on December 11, 2019 for the public to talk to the project team and receive project updates.

You can also contact us now to indicate your interest in attending the public meeting.

*(See contact information below.)*

**NEW MINI ROUNDBOARD**

A new mini-roundabout at Westlake Loop will provide a safer road by reducing speed and acting as a traffic calming measure on E Crestview Dr.

---

**ROADWAY IMPROVEMENTS**

- New mini-roundabout installed at the intersection of E Crestview Dr and Westlake Loop.
- New pavement, curb, and gutter on E Crestview Dr. between N Springbrook Rd. and NE Crestview Dr.
- New bike lanes will be constructed on both sides of E Crestview Dr.
- New sidewalks will be placed on both sides of E Crestview Dr. (east of Springbrook Rd.)
- Additional street lighting and new street trees along the corridor.

**UTILITY IMPROVEMENTS**

- Water, wastewater, and stormwater improvements along with underground utility relocations to ensure more reliable service and minimize future roadway impacts.

**PROJECT BENEFITS**

- New mini-roundabout to improve safety on the road by reducing speed and potential collisions.
- Alternate route for accessing Hwy 99W and Providence Dr. by residents and travelers.
- Improved access, safety, and ease of use for travelers, including motorists, pedestrians, and bicyclists, as well as for residents.
- New sidewalks, new trees, and improved street lighting.
