What improvements will be made on Elliott Road?

Design work has not begun. We don't know what the changes will look like, we hope to be looking at options in August with the community.

The City of Newberg and a consultant team is currently collecting information about the stormwater system, locations of underground and above ground utilities, locations of trees, and other existing conditions along Elliott Road. You have likely seen crews in the area.

The City will be using this information, as well as input from property owners and residents, to design a set of improvements that will improve safety for all users on this route to Newberg High School and to improve management of stormwater runoff.

Join us at a neighbor field visit – July 23 or July 24

Join us at the entrance to the high school parking lot at the north side of Elliott Road. We'll meet outside, look at and discuss some issues we see happening related to safety, pavement condition, stormwater, and more. We'd like to hear your observations about conditions along Elliott Road.

Please help us collect information about the existing conditions.

- Are you experiencing any nuisance flooding? Where?
- Are you aware of any visibility or sight line issues?
- How do garbage, mail, and other serve your property?
- Tell us about the traffic – during school year or special events.
- What concerns or ideas do you have about pedestrian, road, and stormwater improvements?

Meet at the Elliott Road entrance to the high school parking lot on either date:

- **Tuesday, July 23 5:30-6:30 p.m. (early evening)**
- **Wednesday, July 24 10:30-11:30 a.m. (mid-morning)**

If you are not able to attend or would like to talk about an issue you see along the street, please come to our August open house or email or call.

August Open House being scheduled – Watch your mailbox for an invitation to the August open house. Our first community meeting will be held the second week of August and we'll send a date/location soon. This will be an indoor meeting to look at maps, what we've learned, and start thinking about improvements with the community. As meeting dates and maps are available, information will be posted on the web at: <https://www.newbergoregon.gov/projects>.
