1441 Deborah Road in Newberg

We'd like **YOUR** input on concepts for Elliott Road improvements

The City is designing improvements to N Elliott Road between OR99W and Newberg High School. The project includes better safety for all users, including pedestrians and cyclists, and an upgraded stormwater system.

The Project team has mapped utilities, trees, property lines, driveways, power lines, and more. We also met with neighbors for a street walk to look at concerns and ideas. All of this information has been used to create design concepts that are ready for **your** input.

Design work will proceed after the technical information, neighborhood and community input, and potential impacts are all reviewed. The design phase should finish in early 2020, followed by phased construction in 2020 and 2021.
