

VILLA ROAD

Safer, Healthier People and Community

City of Newberg is dedicated to providing essential improvements to our community for a healthier life for our community, such as adequate housing, education, transportation and safe places to exercise. Villa Road embodies just that.

SIDEWALKS

Currently: Villa Road has a highly inconsistent sidewalk network with very few completed portions.

New Design:
Adding 3,200ft of continuous sidewalk to allow for safe traveling in both directions.

BIKE LANES

Currently: Villa Road has limited existing bicycle lane. An existing striped shoulder exists in a portion of the north bound direction.

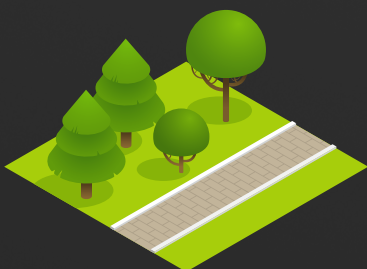

New Design:
Adding 3,200ft of continuous on-street bike lanes traveling in both directions.

ROADWAY

Currently: Villa Road provides a critical north-south connection north of Highway 99W. The pavement is in poor condition and the geometry of the roadway does not meet City design standards.

New Design:
Villa Road will be newly paved and provide safe improvements for all vehicular traffic, which meets current City design standards.

LANDSCAPING

Currently: There is no formal landscape design in this area.

New Design:
Will include 31 trees (oak, ash, alder, willow & cedar), over 3,000 shrubs and ground covering plants.
